In making an assessment of the hardware, software, network infrastructure availability and requirements at each of the current vending offices, the tenderer shall keep in mind the system configuration required by the Blue Crane Route Municipality and utilize the current network infrastructure belonging to the Blue Crane Route Municipality. It remains the responsibility of the tenderer to ensure compliance to the tenderer's minimum requirements.

The vending system must be TCP/IP compliant and functional over Ethernet on a LAN/WAN environment. WIFI, GPRS, ADSL and Diginet lines must also be accommodated.

The vending solution offered by the tenderer must be capable of managing and vending to Electricity STS meters from a common platform and user interface. A single consumer record must have the capacity to have Electricity meters linked to it.

A hosted database configuration set is required with standby disaster recovery capability for business continuity.

A disaster recovery plan shall be provided with all necessary hardware and infrastructure utilised.

Assurance of business continuity in the event of a catastrophic systems or communications system breakdown in the Municipal environment must be provided. A description of associated redundancies built in to the offered solution must also be provided

The system should have the capacity to provide for a monthly update of a local database copy in the Blue Crane Route Municipality premises if and when required.

5.2. PHYSICAL LOCATION OF SERVERS AND WORKSTATIONS

The configuration envisaged by the municipality is one where the management and vending server(s) will be located off-site in a high availability environment with redundant power and connectivity. Full disaster recovery and business continuity including the onsite local database server must be provided by the service provider for BCRM.

Vending workstations (credit dispensing units) will be required at each of the vending offices. The system must not be limited to existing workstations and locations.

Any system limitations shall be indicated by the tenderer.

6. PERFORMANCE SPECIFICATION

6.1. A full and detailed functionality description of the system shall be provided by the tenderer.

6.2. The tenderer shall not focus on provisioning of computer hardware since the Blue Crane Route Municipality will use existing infrastructure where possible. For this reason, it is also imperative that tenderers should be quite clear on where the Blue Crane Route Municipality's hardware and/or networks lack the capability and/or capacity to function properly with the system proposed by the tenderer and the tenderer should indicate the cost of additional or replacement infrastructure.

A detailed graphical drawing depicting the proposed network and system layout must be drafted to clarify and indicate solution functionality. Should changes be required, full specifications and pricing must be provided.

6.3. The system proposed by the tenderer should at least make sure that:

Different servers are utilized for different applications such as:

SECTION 4.6 MBD 9: CERTIFICATE OF INDEPENDENT BID DETERMINATION

1. This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
3. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
